UNMASKING NEPOTISM

By Brian Kanke

Chairman of Zoo Pharma Dynamics

You may be wondering, where is this article heading? Recent events have caused me to pause and reflect on what is happening and how it is occurring. I am heavily involved in politics in Texas and was struggling to find answers to my questions. I took a step back to clear my mind and figure things out. I have come to the conclusion that nepotism is our biggest problem, and we have allowed it to happen. It is often said that change starts at the bottom level, not at the top. As I observe what is happening in my community, across Texas, and at the federal level, I realize that nepotism permeates at all levels. Research shows that nepotism is the number one cause of societal downfall and is essentially another word for corruption. We are currently in an election season that will determine the fate of our country for years to come, and that is concerning. If this election is not voted on correctly, it will be filled with nepotism and will destroy our country. It is one thing for an ineffective person to get elected, but it is a completely different situation when an entire family of ineffective individuals gets elected. I urge you to think about this issue and get involved in stopping nepotism. We can accomplish great things together, not as individuals, but I also applaud those who are fighting alone to make things right.

As a deer farming community, we are combating those in power who were appointed by their friends, and these friends are the only ones who can remove them from their positions. Friends tend to stick together, regardless of whether they are right or wrong. They must support the personal agenda of their appointee or the financial backers behind their election to office. I do not believe that appointed positions should have the authority to create laws, except for the Justices of the US Supreme Court. Positions that affect the majority of the people should be elected by the people. Elected legislators should administer laws, rules, and regulations, while appointed individuals should simply carry out what has been given to them by the legislature. If nepotism continues unchecked, we will distance ourselves further from democracy and slide towards a dictatorship. I will not accept a socialist or dictatorial society. The US Constitution is explicitly written to prevent those things from ever happening. In 1986, I took an oath to defend the Constitution of the United States of America, and I will never waver in that commitment.

I hope that people will understand what I have written and take action to support the deer farming industry and hunting in general. Both are under attack, one overtly and the other in a more hidden manner. I am dedicated to dedicating my time and resources to help the Deer Breeders Co-op (DBC), as I believe this organization is ready to fight for the preservation of Deer Farming and, most importantly, their network of supporters. Please feel free to reach out to me at any time with any questions. ■

Did You Know?

- Axolotls, a type of salamander, have the ability to regenerate lost body parts. They can regrow not only limbs but also vital organs, such as their heart and spinal cord.
- The mimic octopus is a master of disguise. It can change its shape, color, and behavior to imitate various other marine creatures, such as lionfish, flatfish, and sea snakes.
- Dogs have an incredible sense of time. Studies have shown that dogs possess an internal clock and are able to gauge the passage of time to some extent.
