## FARMING IS UNDER ATTACK

By Brian Kanke

Chairman of Zoo Pharma Dynamics

Across America, and especially here in the heartland, we have a rich history of family farming and hard work. We understand the vital role that farmers play by providing food, not only for our local communities, but also for the world beyond thanks to important trade agreements that have opened new markets. These agreements allow farmers to reap the benefits of their labor on a worldwide scale and have contributed to America's rise as the world's only superpower. In fact, American farmers' agricultural exports alone reached \$196 billion in 2022, up more than threefold from \$62.8 billion in 1997.

Since the first day of President Biden's term, America's farmers, ranchers, and producers have come under constant attack, through burdensome regulations, exacerbated by record inflation, high input costs, the politicization of crop protection tools, anti-energy initiatives, supply chain disruptions, and labor shortages.

The backbone and soul of our great country are being slowly destroyed by an un-American agenda. Our great nation was built on the backs of farmers and we must take a stand and protect them for they are the key to National Security. Although our great military is part of the wall of protection, the world's food supply is the controlling mechanism. He who controls the food chain also controls the people. The leftist agenda is to make this country dependent upon others. In order for this country to remain a superpower, it must be the largest producer and exporter of food. Real food, not lab-grown meat or meatless plant-based hamburgers. We naturally grow and produce meat and vegetables under the terms mother nature has provided. I can't find anywhere that says eating something fake is healthy for you.

God provided the forage and the animals so we could sustain ourselves through good practices. We shall not alter or go against God's plan. We shall follow God's plan with an open heart and be blessed that he has provided the food to nourish our soul. I have not found TOFU in the Holy Bible anywhere. I've never met a farmer that didn't pray for success and always thanked God for his harvest whether meat or crop. I would think listening to farmers might just get us back on track with Christianity.

The majority of Americans make the trip to the grocery store and pick up what they need with little to no thought of how it got there and what it took to produce it. They only get frustrated when the item they want isn't available. Go find out why it wasn't there. The farmer wanted to get it there but all the obstacles they must overcome on occasion prevent the farmer from getting it there.

As an American, go educate yourself on the crisis the American farmer is dealing with and support them. The American Farmer is our National Security Protection. As an American, be a Patriot and use your voice to protect our heritage of farming. The next time you go to the grocery store, many items might not be there and there might be someone there not allowing you to buy it because they are in control. Don't allow a foreign entity to control the US food supply.

### Did You Know?

- Agriculture is the world's largest employer
- The average U.S. farmer can feed 155 people
- Beef farming accounts for 29% of American farms.
- There are 914 million acres of farmland just in the U.S
