Overcoming Political Roadblocks To Save Texas Deer

By Brian Kanke
Chairman of Zoo Pharma Dynamics

You can write the best script and hire the best actors, but if no one supports the show, you won't have an audience. Zoo Pharma Dynamics (ZPD) has written a script to address a disease here in Texas that has become a major political issue. This situation demonstrates that people's livelihoods and their passions can be destroyed due to predetermined outcomes. It seems that there is a powerful force with its own agenda, overriding individual desires.

Fortunately, this current narrative will change, and the senseless killing of perfectly healthy deer will come to an end. I have never heard of eradicating a disease by killing everything, especially when it originated in the wild. We did not resort to killing everyone who tested positive for Covid, despite the government's fearmongering. Instead, they caused enough deaths by misleading people with ineffective drugs and respirators.

When will we wake up and fight for ourselves and our beliefs? Chronic Wasting Disease (CWD) is not the same as Covid for deer, nor is it the same for humans. It is astonishing how scientific evidence can be disregarded when personal tragedy is invoked. Listen up, the innocent deer that were killed, despite being healthy, have their own tragic stories to tell. These acts of killing deer in captivity go against the principles of animal husbandry as outlined in the book of Deuteronomy in the Bible. You can ask yourself, to whom do you answer?

For me, it is God! However, I also hold myself accountable and am my harshest critic. ZPD is assisting deer farmers to eradicate this disease from their herds, although unfortunately, we are only contacted when the situation becomes dire. I will never turn down a deer facility seeking help. It is strange that ZPD can aid in eliminating CWD without resorting to mass killings. It is clear that propaganda is designed to confuse the end user, which probably explains why we have never been invited to a meeting or discussion about CWD and how to combat it. I have offered our assistance numerous times, and I have emails to prove it. I am not interested in engaging in debates over words or interpretations. I am simply asking to be heard and to sit down together to explore ways to stop the unnecessary killing of innocent deer. I don't think that's too much to ask.

Did You Know?

- The pistol shrimp has one of the fastest movements in the animal kingdom. When it snaps its claw, it creates a cavitation bubble that collapses with an amazing speed of around 60 miles per hour.
- The tongue of a blue whale, the largest animal on Earth, weighs as much as an elephant!
- Cows have a unique way of making friends. Research has shown that cows form close bonds with their companions and have best friends within their social groups.
- The mimic octopus possesses one of nature's most extraordinary camouflage abilities. It can change not only its colors but also its body shape and movements to imitate other animals.
