Amazing Animals

By Brian Kanke
Chairman of Zoo Pharma Dynamics

Cervids are amazing animals with similar characteristics but can be so different based on species.

The common traits, four legs, four hooves, and the males have antlers and the females don't. All of this is dependent upon mother nature as exceptions have occurred. I know first hand that each has their own personality. They have companions whom they wish to be around and are friendly to others in passing as long as they continue to pass by and not attempt to breach the companion group.

Doe's are the most protective and selective of the group they are part of. Bucks never care until the rut is on and they have no companions. There is a lot to learn about Cervids.

Zoo Pharma Dynamics (ZPD) is going to give you an opportunity to come and learn and advance your knowledge in regards to Deer Farming.

Cervid Breeders Institute (CBI) is completing it's new Research and Development Facility and Training Center. The Spring of 2023 will be the first training seminars offered by ZPD through it's Cervid Breeders Institute.

You will have the ability to come and experience hands on real time situations on a working Deer Farm with its own research and development facility. You will be introduced to the ZPD line of products. You will find out and learn how we prevent and cure CWD along with several other products to keep Cervid's healthy and thriving. Our research and development never stops as we want to protect Deer Farming.

We hope you will enjoy our newsletter as we enjoy putting it together. We want you to find it informative and entertaining. If you have a topic or a question you would like addressed in the next newsletter please email us. We always appreciate pictures of the funny things animals will do. God Bless and Keep Animals Happy and Healthy!

Fun Facts

- Deer can sprint up to 30 miles per hour.
- Deer can leap as high as 10 feet and as far as 30 feet in a single bound.
- One in 30,000 deer is an albino.
- Deer are the only group of animals in the world to have antlers.
